DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements submitted on 30JUL2003 have been considered by the Examiner and made of record in the application.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: C.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: IE, N, NML, NMS, and Network Management System.

Appropriate correction is required.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the

Art Unit: 2109

applicant will be notified and informed of any required corrective action in the next Office action.

The objection to the drawings will not be held in abeyance.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

a) On **line 2 of claim 1**, insert --network management-- before “system” in order to provide proper antecedent basis for “system.

b) On **line 5 of claim 1**, insert --policy-- before “rules” in order to provide proper antecedent basis for “rules”.

c) On **line 6 of claim 1**, insert --policy-- before “rules” in order to provide proper antecedent basis for “rules”.

d) On **line 6 of claim 1**, replace “services” with --service-- after “comprise”.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. **Claim 1** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2109

8. Regarding **claim 1**, the word "means" is preceded/followed by the word(s) "processing/for acquiring, for determining" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding/following "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. **Claim 1-3** rejected under 35 U.S.C. 102(b) as being anticipated by **Godlew et al. (US Patent # 5,377,196)**.

a) Consider **claim 1**, Godlew et al. clearly shows and discloses, network management system for implementing a service on a network (abstract, column 1 lines 35-37, column 3 lines 11-13), said system including means for acquiring policy rules for configuring said service (figure 13, figure 14, abstract, column 3 lines 13-41), means for determining commands corresponding to said policy rules and transmitting them to network elements (column 3 line 24-41, column 15 line 38-45, column 16 lines 14-25), and processing means for inferring said rules in order to determine said commands (figure 14, figure 15, abstract, column 15 lines 38-45, column 17 lines 4-6, column 28 lines 10-25), in which system said rules comprise services rules and implementation rules (abstract, column 1 lines 43-61, column 17 lines 1-31, column 33 lines 51-58 lines 66-68, column 34 lines 1-4 lines 31-37).

Art Unit: 2109

b) Consider **claim 2**, and as **applied to claim 1 above**, Godlew et al. clearly shows and discloses, the network management system claimed in claim 1 wherein said processing means include an inference engine (figure 14, figure 15, abstract, column 15 lines 38-45, column 17 lines 4-6, column 28 lines 10-25).

c) Consider **claim 3**, and as **applied to claim 1 above**, Godlew et al. clearly shows and discloses, the network management system claimed in claim 1 wherein said implementation rules include technology rules and/or equipment rules (abstract, column 1 lines 43-61, column 17 lines 1-31, column 33 lines 51-58 lines 66-68, column 34 lines 1-4 lines 31-37).

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Arita et al. (US Patent # 5,701,394) disclose: "Information Processing Apparatus Having a Neural Network and An Expert System"
- Lewis (US Patent # 5,687,290) discloses: "Method and Apparatus for Monitoring and Controlling Communications Networks"
- Lindskog et al. (US Patent # US 6,370,572 B1) disclose: "Performance Management and Control System for a Distributed Communications Network"
- Geddes (US Patent # US 6,751,661 B1) discloses: "Method and System for Providing Intelligent Network Management"
